

Core indicators for financial inclusion data measurement

The following table summarizes the core indicators for measuring data concerning financial inclusion.

These indicators were agreed to by the Alliance for Financial Inclusion (AFI) [Financial Inclusion Data Working Group \(FIDWG\)](#) at their third bi-annual meeting in Lima, Peru from March 2-3, 2011.

Dimension	Indicator	Proxy Indicator (indicators that can be used instead of the recommended indicator)	Definitional comments
Access	1.1. Number of access points per 10,000 adults at a national level and segmented by type and relevant administrative units		Regulated access points where cash (including deposits) in-and-out can be performed.
Access	2.1. Percent (%) of administrative units with at least one access point 2.2. Percent (%) of total population living in administrative units with at least one access point		
Usage	3.1. Percent (%) of adults with at least one type of regulated deposit account 3.2. Percent (%) of adults with at least one type of regulated credit account	3.1(a). Number of deposit accounts per 10,000 adults 3.2(a). Number of loan accounts per 10,000 adults	Adult is 15 years and older, or country-specific
